No Authenticity in Hindenburg Report, Adani is Transparent

We are pleased to present our research analysis that A study of Hindenburg Research LLC's website reveals that its owner, Nathan Anderson, was formerly an ambulance driver. In 2017 he has established Hindenburg Research LLC to catch corporate fraud. **The terms and conditions of the Hindenburg website clearly states that they bet on getting the profit.** By looking at the actions of Nathan Anderson, it can also be clearly understood that he is ready to put many people or even the whole society in danger in order to get the maximum benefit. Apart from Adani Group, it has also made reports on many other companies of the corporate world, reading which shows that it has made big allegations on these companies. Nothing about the good works of any company in the corporate world is found in the Hindenburg report.

Instead of credibility in its report, it seems like rigging. Prima facie it seems that Hindenburg may be a broker not businessman who has created such a platform as his website, where work is done on orders or on contracts. Hindenburg's customers can be such people who aim to destroy the growing and popular economy of a country. For this they also fund him.

India's economy remained stable and better in the world even in the era of Covid-19 pandemic. Adani Group, one of the leading corporates of India, has shown strong performance even in times of recession and has presented proof of being the pillar of India's economy.

Adani Group is becoming loyal to the country along with ensuring its honesty, responsibility and accountability among the public. This talent makes him a great player in the corporate world. His goodwill makes him the richest corporate in Asia. Behind this is the huge contribution of the team appointed by him. Anti-Adani voices have emerged in India in the last few years. Only people from India are involved in doing this. May be such opposing voices have emerged elsewhere in the world and they have also come on Nathan Anderson's platform Hindenburg and both have bet that this is the right time to attack Adani Group, one of the pillars of India's economy. **We not only hope but have full confidence that Adani group will be on the way to a better comeback in the next few days.**

Hindenburg's report cannot be called reliable from anywhere, because it is based only on such data which is desired. The people of India should trust Adani Group because he is a person from among us, belongs to our society. In the midst of the global economy, the corporate world continues to be ups and downs. Share prices keep on fluctuating but again the old situation returns in a few days. Therefore it's no wonder. Hindenburg's report can do nothing to a Corporate Group like Adani. Indians should have absolutely no trust in a man who is neither of us nor knows humanity. He then works on orders or contracts to make profit, Hindenburg is one of them. **Adani Group should also take strict legal action against Hindenburg, it should also be investigated that whose mind and hands are to hire Nathan Anderson.** India is the fifth largest and emerging economy in the world. **In the coming time, there may be more attacks like Hindenburg on it. After Adani, anyone else can be its next target. The people of India have to be ready and alert to dismiss such allegations as baseless.**
